

Strategy 2020

Based on the current student number of around 300, a steady, sustainable growth will be sought. The school is designed for a maximum of 450 students. The economically viable minimum is about 230 students.

The proportion of German-speaking students is a critical success factor and should be given extra attention. The German language and culture and the completion of the bilingual Maturity are further strengthened as unique selling points to position the school in the market. The school is perceived as an international school and will build its status as a competence center of the German language and culture for children and adolescents.

German as main language at school is to be ensured. At the same time, the already present multilingualism in Secondary and as well Primary should be strengthened. Through individualized learning, students are supported even further, both to meet the high demands of the curriculum and to build their social competence.

Sustainable and crisis-proof school operation is ensured through providing an innovative and modern learning environment. Students are optimally supported until the end of their school career.
